PROFILE

Software Engineering student with solid backend and system-oriented foundations. Experienced in C++, Java and Python development, client-server architectures, and databases. Proven ability to thrive in structured environments through academic projects and military technological service. Fast learner with strong ownership, seeking a Software/Backend Engineer Student role.

EDUCATION

B.Sc. in Software Engineering | Braude Academic College | 2024 – 2028 (Expected)

- Relevant coursework: OOP, Data Structures, Databases, Operating Systems, Algorithms.
- Current GPA: 84

High School Diploma | ORT Nahariya | 2015 – 2018

- Computers & Electronics
-

SKILLS

- **Programming:** C++, Java, Python, C, JavaScript
 - **Databases:** SQL, MySQL, SQLite (Schema design, CRUD operations)
 - **Web & Systems:** FastAPI, REST fundamentals, HTTP, Client-Server Architectures
 - **Tools & OS:** Git, GitHub, Linux, VS Code, AntiGravity, Claude Code
-

PROJECTS

GameBoy / Retro Console Emulator – C++ (Personal Project)

- Developed a functional emulator for a classic gaming console using C++.
- Implemented core hardware components including CPU instruction handling and memory mapping.
- Utilized low-level programming concepts such as bitwise operations and efficient memory management.

Autonomous Support Agent (Personal Project)

- Built an autonomous support AI agent powered by Qwen 2.5, using LangGraph, LangChain, and FastAPI.
 - Implemented an LLM-driven state machine for intent classification and dynamic SQLite database operations.
 - Created a Streamlit chat interface to showcase real-time agent reasoning and customer data management.
-

MILITARY SERVICE

Computer Networks Manager – C4I Corps | 2018 – 2021

- Managed and maintained critical computer networks and infrastructure in a high-responsibility environment.
 - Performed system monitoring, troubleshooting, and network performance optimization.
 - Assisted with automation and scripting-based tasks to significantly improve operational reliability.
 - Completed an internal Java course, strengthening programming fundamentals.
-

EXTRAS

- **Languages:** Hebrew – Native | English – Fluent
- **Learning & Development:** Currently expanding knowledge in Artificial Intelligence (AI), Agentic development, and Full-Stack development.
